Instruction Manual

You have purchased a LIVOO brand product and we thank you for it. We give great attention to the design, ergonomics and ease of use of our products. We hope that this product will give you complete satisfaction.

This instruction manual is available too on our website www.livoo.fr

SAFETY INSTRUCTIONS

PLEASE, TAKE TIME TO READ WELL THE INSTRUCTIONS FOR USE PARTICULARLY BEFORE THE FIRST USE. A misuse of the appliance can damage it or hurt the user. Assure that you use the appliance for the use for which it is designed, we refuse any responsibilities as for the damages by an incorrect use or a bad manipulation.

1. Before connecting your appliance, verify that the supply voltage indicated on the indicator plate of the appliance corresponds properly to that of your electrical installation.
2. No responsibility may be assumed in case of damages caused by non-compliance of this manual by the user or by faulty use or handling.
3. This appliance is meant for ONLY DOMESTIC USE and FOR INTERNAL USE.
4. Use this appliance only as indicated in the instruction manual.
5. Before each use, ensure that the supply cord is in good condition.
6. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons (*) in order to avoid a hazard.
7. Never plunge the appliance, its supply cord or the plug

Instruction Manual

in water or any other liquid.

8. Do not handle the plug on the appliance with wet hands.
9. This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
10. When you disconnect the supply cord, always remove it from the plug. Do not pull on the cord itself.
11. Unplug the appliance during filling, cleaning and other maintenance.
12. Ensure that the appliance is always placed on a flat surface, dry and stable.
13. Do not use chemical products or abrasive detergents for cleaning, which may easily damage or deform your appliance.
14. For reducing the risk of electric shock, never use this product with wet hands, never spill a liquid on the product or submerge it in water.
15. Do not use outside (For internal use only). This appliance is not suitable for industrial or open-air use.
16. This appliance is not designed to be used with an external timer or a separate remote-control system.
17. Do not operate this appliance in any greasy

Instruction Manual

environments, such as kitchen. This product is not intended to filter oil or grease from the air.

18. Do not use the air purifier in bathrooms or other humid environments. Do not use near fireplaces or in areas where flammable or combustible vapors or products may exist.
19. Always unplug the power cord from the electrical outlet when the purifier is not in use, before cleaning, inserting or removing parts or before moving to another location.
20. Never run the air purifier unless it is fully assembled.
21. Always turn off all controls before unplugging the air purifier from the outlet.
22. In case of the replacement of the UV-C emitter, please read carefully the safety points 24,25,26,27 and 28.
23. This appliance contains a UV-C emitter
24. Unintended use of the appliance or damage to the housing may result in the escape of dangerous UV-C radiation. UV-C radiation may, even in little doses, cause harm to the eyes and skin.
25. Appliance that are obviously damaged must not be operated.
26. Read the maintenance instructions before opening the appliance.
27. The appliance must be disconnected from supply before replacing the UV-C emitter.
28. This appliance is intended to be used in household and similar applications such as:
 - staff kitchen areas in shops, offices and other working environments
 - farm houses

Instruction Manual

- by clients in hotels, motels and other residential type environments
- bed and breakfast type environments

(*)**Authorised qualified electrician:** after-sales department of the manufacturer or the importer or any other qualified person, approved and authorised for carrying out this kind of repair for avoiding any danger. In any case, you must send the appliance to this electrician.

SPECIAL SAFETY INSTRUCTIONS

Warning:

- **UV lamp notice:** UV light is harmful to bare skin and eyes and can cause temporary or cleanable loss of vision. Never look directly at the UV lamp while it is illuminated; doing so could cause loss of vision! Only view illumination through the window at the front of the unit. To prevent exposure to ultraviolet light, disconnect the power to the unit before servicing any part of this appliance.

- **UV lamp disposal:** If UV lamp breaks, turn off the unit. Do not operate the unit with a broken lamp. Do not use a vacuum to clean up breakage. Sweep debris into a plastic bag and disposal properly. Contact your local waste management authority for instructions regarding recycling and the proper disposal of old lamp(s).

- **Mercury Notice:** because this appliance contains a light bulb which contains mercury, please pay attention to following points:

. Do not place your used lamp(s) in the trash. Disposal of any item containing mercury must be in accordance with any hazardous waste disposal or recycling laws and regulations of your state.

. This product complies with the maximum allowable concentration of ozone of 0.05 part per million by volume(ppmv) in a 24-hour period.

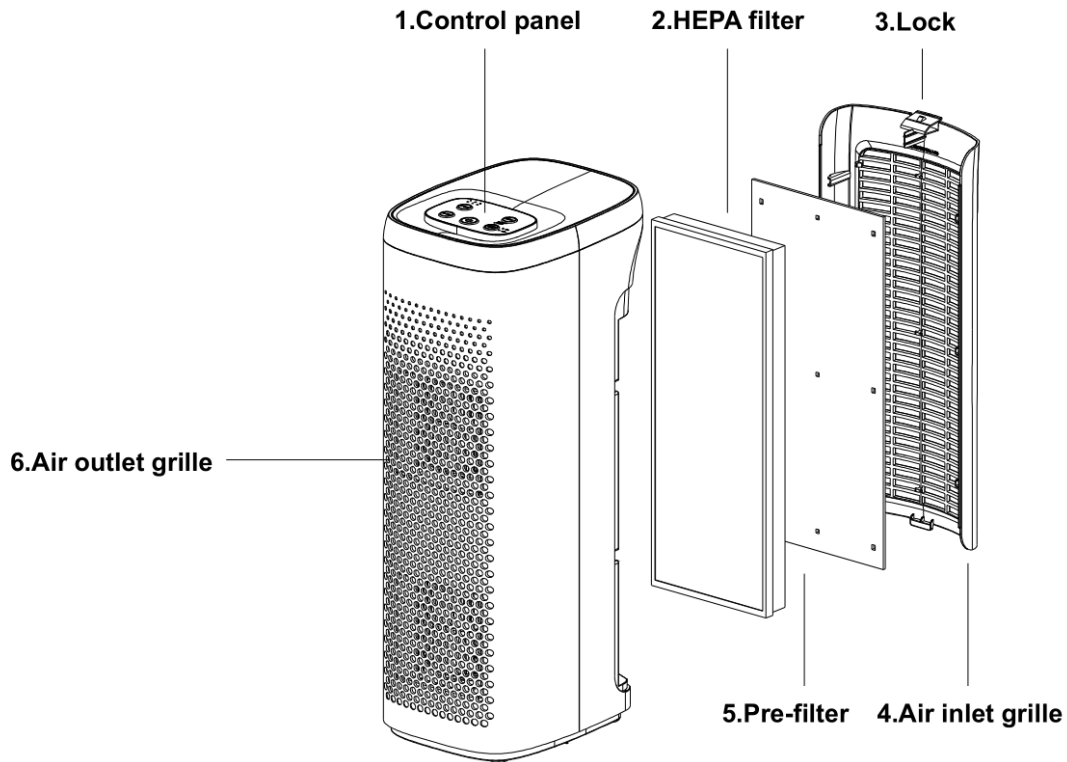

TECHNICAL SPECIFICATIONS

Voltage : 220-240V~50Hz

Instruction Manual

DESCRIPTION

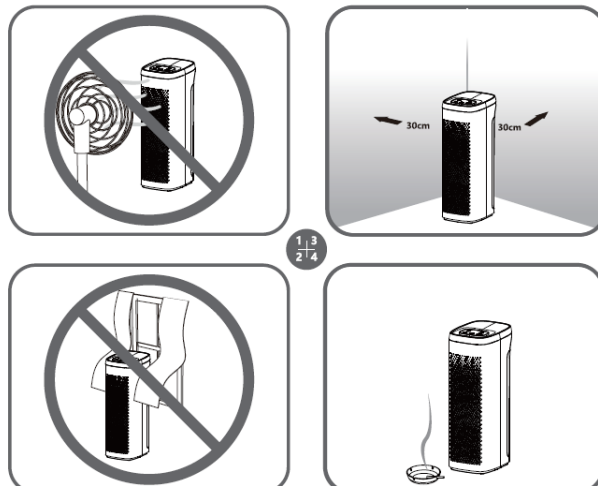

USE

Before first use

1. Remove all packaging materials from the air purifier, **including the packing material around the air filter inside of the appliance.**
2. Please keep the product away from fan to avoid affecting the normal operation of the product.
3. Do not place the product near the curtains to prevent the curtain being sucked in and therefore damaged the product.
4. when using and ensure that the appliance is at least 30cm away from the wall to ensure normal running.
5. Please put the product in the polluted air area to effectively improve the indoor air quality

Notice: Check the filter before using. Do not use this product if the filter is damaged. Please replace a new filter if there are cracks or holes in the filters.

Instruction Manual

On/Off Button: Press the power button to switch on the appliance

Fan Speed Adjustment: In the power-on state, press the “SPEED” button to adjust the fan speed. Press the wind speed button continuously (delay 0.5 seconds between each gear position), the wind speed of the machine will be switched from 1 to 3.

Sleep Mode: In the power-on state, press the “+” button and the machine will enter in sleep mode: the machine will run at Speed 1, and other indicator will be turned off except the speed light; press it again and the machine will exit from the Sleep Mode.

Air sensor: The air purifier is equipped with an air sensor to monitor the quality of your air. Simply press the on/off button and air sensor button to activate the air monitoring system. The monitor will test the air quality and automatically adjust the fan speed to remove the air contaminants. The front of the display is equipped with LED lights to notify you of the air quality. RED color is for poor, ORANGE for fair and BLUE for good quality air.

Ioniser button: Press the Ioniser button to turn on the IONS. Press it again to turn the IONS off.

UV control button: Press the UV control button “UV” to turn on the UV lamp and the photocatalyst filter.

Instruction Manual

Timer control : Air purifier can be programmed to turn off after a preset amount of time. Press the “TIMER” button to program the timer 2-4-8H.

Filter Replacement Indicator : When the cumulative working time of the machine reaches 1500 hour, the pre-filter indicator light will be lit up(red) to remind you to replace the filter; when the cumulative working time of the machine reaches 3000 hours, HEPA filter indicator light will be lit up(red) to remind you to replace the filter.

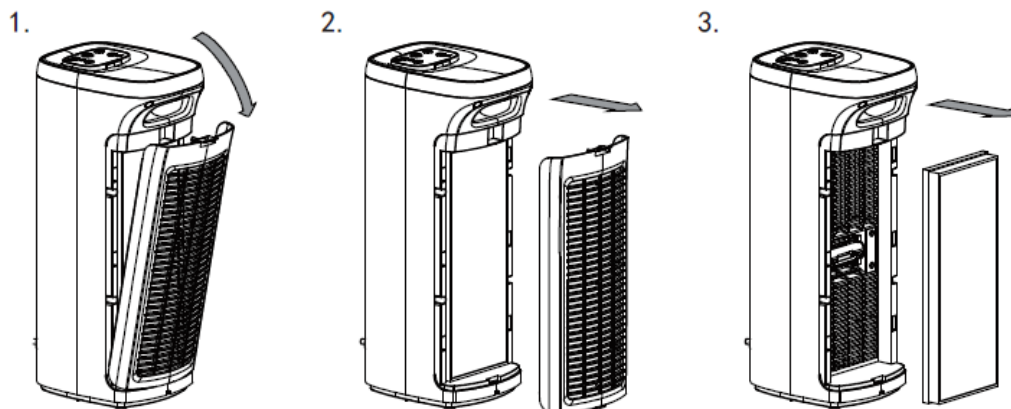

When only PRE filter indicator light is on, press Timer+AUTO button for 3 seconds to turn off PRE indicator light and clear PRE filter screen timing; when only HEPA filter indicator light is on, press Timer+AUTO button for 3 seconds to turn off HEPA indicator light and clear HEPA filter timing; when both filter indicator lights are on, press Timer+AUTO button for long. In 3 seconds, two filter indicators can be switched off, and two filters timing will be cleared.

CLEANING AND MAINTENANCE

Warning: Before cleaning and maintaining this product, be sure to turn off the power and unplug it to the power source to avoid electric shock.

Replace the HEPA filter

1. Pull the air inlet grille out (see the picture).
2. As shown in the figure, the air inlet grille has been opened.
3. Grab the frame on both sides of the HEPA filter and remove the filter from the product.
4. Replace the unused HEPA filter with the reverse operation as shown below.

Pre-filter Maintenance

The preliminary filter can be cleaned with water. It is not recommended to use the air purifier in places which full of candles, soot, fireplace soot, or smoke. If used in such an environment, the filter should be cleaned frequently.

Attention:

- Please carefully identify the front and rear direction of the filter assembly to avoid wrong

Instruction Manual

installation.

- It is recommended to wear gloves when replacing the filter. And in order to prevent the secondary pollution in the old filter components, please put the old filter components in plastic bags before discarding them to prevent the secondary pollution to the environment.

Outer Surface Cleaning

1. Turn off the power and unplug
2. Clean the surface of the machine casing with a soft cloth and a little soapy water.
3. Do not allow water to flow into the machine, as this may damage your machine and cause electric shock and damage to you.
4. After cleaning, please put the product in a ventilated place (not exposed), until the machine is completely dry before turning it on.

Troubleshooting

Common problem	Possible cause	Solutions
The machine doesn't work	1 The power switch is not turned on 2 Unplugged	1 Press the power on button to turn it on 2 Check whether the power has been turned on
Airflow reduced or purification effect is unsatisfactory	1 Air inlet or air outlet is blocked 2 Pre-filter may be blocked 3 Filter life expires	1 Check and make sure the air inlet and outlet are not blocked 2 Check and clean the filter if necessary 3 Replace the filter
The filter indicator blinks all the time	1 Filter life expires 2 Filter is not reset after replacing the filter	1 Replace the filter 2 Reset filter setting

Instruction Manual

**Correct disposal of the unit
(Electrical and Electronic Equipment)**

(Applicable in the European Union and the rest of Europe that have adopted separate collection systems countries)

The European Directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE), requires that old household electrical appliances must not be disposed of in the normal household waste stream.

Old appliances must be collected separately in order to optimize the recovery and recycling of the materials they contain and reduce the impact on human health and the environment.

The symbol of the crossed out dustbin is marked on all products to remind the obligations of separate collection.

Consumers should contact their local authority or retailer for information concerning the correct disposal of their product.
