## Instruction Manual

You have purchased a product LIVOO brand and we thank you. We take great care in design, ergonomics and ease of use of our products. We hope that this product will give you complete satisfaction.

This instruction manual is available too on our website [www.livoo.fr](http://www.livoo.fr)

### GENERAL INSTRUCTIONS

TAKE TIME TO READ WELL THE INSTRUCTIONS SHEET BEFORE THE FIRST USE.

A misuse of the appliance can damage it or hurt the user.

Assure that you use the appliance for the use for which it is designed. We refuse any responsibilities as for the damages by an incorrect use or a bad manipulation.

1. Keep the instruction manual with the appliance. If the appliance is to be used by a third party, this instruction manual must be provided. Use the appliance only for private use and in the manner specified in the instructions.
2. Warning ! The gas cartridges are under pressure and can explode if heated significantly. Use them carefully. Do not use a gas cartridge if damaged. Before any use, check that either the cartridge nor its valve show any signs of deterioration. Do not try to modify the cartridge. Do not expose the cartridge to heat. In case of leakage, ventilate the room and dispose of the cartridge.

## Instruction Manual

3. The appliance must not be use close to a heat source. It must not be in contact with hot surfaces or heat sources (cooking plates, hot gas or hot oven, ect.)
4. Place the appliance on a flat, stable surface and in an upright position to prevent Co2 from accumulating in the bottle.
5. Warning: Improper use of your appliance can result in serious injury.
6. Do not use the appliance with any beverage other than water. Observe the levels indicated on the bottle.
7. The appliance must be used at room temperature. If the gas cartridge is excessively hot, use of the device could be dangerous.
8. Do not move the appliance during gasification.
9. Do not remove the gas cartridge during gasification.
10. Keep the appliance out of the reach of children and persons with reduced physical, sensory or mental capabilities. Children must not play with the appliance.
11. Keep the appliance dry. Never use it outdoors and never leave it in a place exposed to the weather, heat or moisture.
12. The pressure on the gasification button should not exceed 1 second. You can repeat the carbonation up to 3 time.
13. Do not wash your bottle in the dishwasher or in very hot water (max. temperature +40 °C).
14. Never inject gas into an empty bottle.
15. The gas cartridge must be correctly positioned before starting the appliance.

## Instruction Manual

16. Do not use your bottle if it is deformed, damaged or broken.
17. Do not refrigerate your bottle (min. temperature +5 °C).
18. Use only LIVOO bottles. Replace your bottle after 2 years of use and if the shelf life mentioned on the bottle is out-of-date.
19. When carrying the empty bottle, always unscrew the cap. Store the empty bottle uncapped.
20. Before inserting the bottle, make sure that the gasification rod is not damaged. Do not use the appliance if this is not the case as this could lead to excessive pressure and cause serious injury.
21. CAUTION ! Never insert or replace a gas cartridge while a bottle is attached to the appliance. This could cause the cartridge to be ejected or explode.
22. Never use force to remove the gas cartridge from the attachment. In case the clamping mechanism does not immediately release the cartridge from the nozzle, wait a few moments before trying again. Any attempt to remove the cartridge while still under pressure may result in uncontrolled ejection of the cartridge and cause serious injury.
23. Do not add additives into the bottle before gasification.
24. Regarding the instruction for cleaning surfaces in contact with food thanks to refer to the below paragraph “cleaning” in this manual.
25. Keep this appliance clean at all times as it comes into direct contact with food.

## Instruction Manual

26. LIVOO is not responsible of third-party accessories, either their conformity to the regulation, nor their safety, their correct operation or the damage they can cause.

27. This appliance is designed exclusively for a household application.

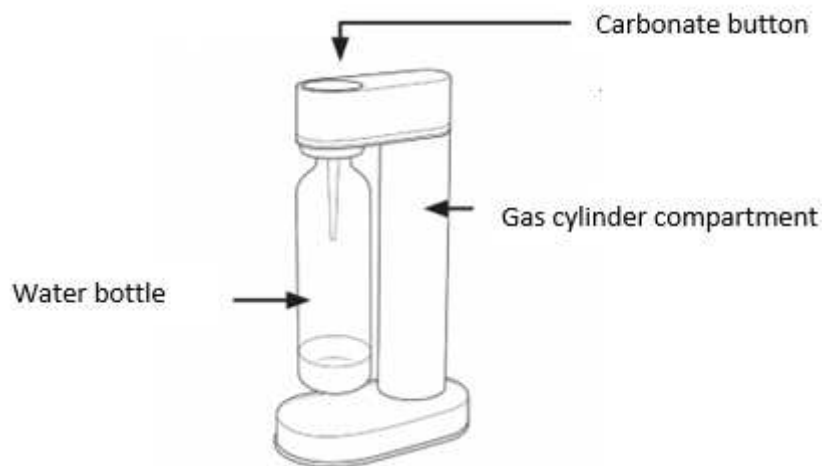

## TECHNICAL SPECIFICATION

Capacity: 1 L

Gas cartridge not included

This appliance is compatible with a wide range of Co2 cartridges including Sodastream® cartridge.

## DESCRIPTION

- The carbonate pressure time should not exceed 1 second.
- Use only LIVOO bottles.
- Use only water to carbonate.
- Do not use your bottle if it is deformed, faded or broken.

Expiry date 30/04/2025

DOM464AC1 + CS 118560

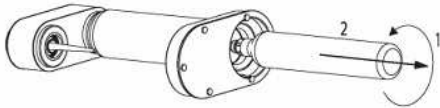

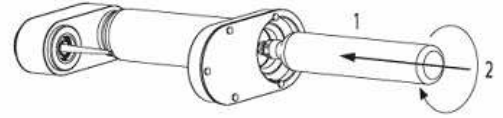

You will find the expiration date on your bottle above the lot number (CS number)

## Instruction Manual

### USING YOUR APPLIANCE

#### Installing the gas cylinder

Unscrew the gasket and cap from the gas cartridge and carefully insert it into the opening below the appliance. Do not let the cartridge fall into the location. When it has reached the end, start screwing the cylinder clockwise until it is secure. Do not screw it in too tightly, as this may damage the threads that hold the gas cylinder in place.

If you need to replace the gas cylinder, lay the appliance on its side with the knob facing up and unscrew it counter-clockwise. Then carefully remove it from the appliance.

#### Operation

Rinse thoroughly the bottle with warm water before using it for the first time.

Fill the bottle with tap water or filtered water respecting maximum level mark.

Screw on the bottle and make sure the bottle is secured properly.

Press the gasification button until you hear a sound from the valve (roughly 1 second). Do not press more than 1 second on the gasification button.

Release the button. The residual pressure in the bottle is released (slight noise). Now unscrew the bottle.

The degree of gasification depends on many factors (water temperature, remaining amount of gas in the cartridge).

You can adjust the degree of gasification by repeating the pressure without unscrewing the bottle :

- One pressure: weakly carbonated water
- Two pressures: medium carbonated water
- Three pressures: highly carbonated water

## Instruction Manual

### CLEANING

Rinse the bottle with clean, warm water and a mild cleaning agent.

If you use a bottle brush, make sure that it is suitable for cleaning plastic bottles and does not leave scratches.

Do not use detergents, aggressive cleaning agents or cleaning agents containing abrasive substances to clean either the appliance or the bottles.

### TROUBLE SHOOTING

| Problems                                                                                           | Causes/Solutions                                                                                                                                                |
|----------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| No gas or too little gas comes out when the button is pressed.                                     | Check if the gas cartridge is empty<br>Try to tighten the gas cartridge a bit more and try again<br>Make sure that you press the gasification button down fully |
| When the button is pressed, gas enters the bottle but the water is not carbonated                  | Try to tighten the cartridge a bit more<br>Check the gas cartridge seal                                                                                         |
| Gas starts to enter the machine when tightening the cylinder even though the button is not pressed | There may be a leak between the cartridge and the appliance. Try to tighten the cartridge a bit more.<br>Something could be wrong with the gas cartridge seal.  |
