User manual

Thank you to have purchased a product brand LIVOO. We take great care in design, ergonomics and simple use of our products. We hope that this product will give you complete satisfaction.

This manual is also available on www.livoo.fr

PACKAGE CONTENT

1 Indoor garden
15 planting basket
15 sponges for germination
5 caps
1 measuring cup
1 Tweezer
1 instruction manual

Information published	Value and precision	Unit
DELTA BP61071 67452 Mundolsheim – France	-	-
Model identifier	LH102	-
Input voltage	100-240	V
Input AC frequency	50/60	Hz
Output voltage	12.00	V
Output current	2.0	A
Output power	24.0	W
Average active efficiency	87.47	%
Efficiency at low load (10 %)	86.19	%
No-load power consumption	0.077	W

FUNCTION MODE

1. Place the indoor garden on a stable surface and plug adapter into power source.
Plug adapter into the on/off button.

Note: the additional switch allows you to turn the LED's on and off.

- Button control:
Short press for on/off

User manual

Note: Automatic lighting control: 14h of lighting for 10h of darkness (after pressing ON).

2. Your various culture possibilities

- Remove planting bed, and then fill the indoor garden with soil.
- Place the seeds (or plants) of your choice in the soil of the garden container. Turn on switch, Once the crops seeded, water the culture, the indoor garden will work automatically

-For hydroponic cultivation

For seed:

- Fill the container with water.
- Pour a small amount of water into the seeding box (just enough to cover the bottom).
- Wet sponge and use the tweezers to place one or two seeds into each hole in the sponge for germination

(Seeds should have little sprouts emerging from the top in 24 hours. Even if they do not, please continue with this process.)

- Connect the power cable to the garden container and turn it on.
- Set the seeding box on top of the garden container and keep the lights on until the roots have grown out of the sponge to approximately (1.0-1.5 cm). Make sure to continue maintaining the appropriate water level. Please note, this process can take some time (3-7 days) depending on the type of seed, and you may need to add a little more water every other day, so that the seeds do not dry out.
- Place the plant baskets into the designated holes in the plant bed, making sure that the roots reach down into the water. Once the plant baskets are situated, turn on the switch to begin a new light cycle until your plants are fully grown. Hydroponic nutrients are necessary for plant growth.
